

## Replacement Mirror/Monitor

Designed to replace the original vehicle mirror, the **CH-RVMIRS** provides a stylish and functional solution for camera vision systems.

Featuring a high brightness LCD display to provide superior visibility over conventional mirror monitors and standard, universal style, bracket to directly replace the factory mirror from a wide range of vehicle makers and models.

## Included Cameras

To get a quality image on the monitor a quality camera is required. The cameras supplied with this kit are higher resolution than most reversing cameras at 1000TVL, have reverse guidelines as standard (these can be removed) and have flexible mounting arrangements to suit most vehicles.

Other cameras are available for special applications (including forward view for the front of the car) and caravan kits can be provided to utilise the second video input.

**Universal Bracket Mount style**

**Bolt Mount style**

### Features:

- High brightness LCD; Up to 800cdm
- Direct mounting using original windscreen fitting
- Excellent mirror performance
- Suitable for standard Toyota and many other makes
- 2 AV inputs for cameras (RCA)
